IN SEARCH OF EXCELLENCE

SP-SERIES THE FLAGSHIP OF ASA-LIFT

ASA-LIFT is a world leader in the production of self-propelled machines for the harvesting of carrots, beetroots, parsnips, turnips, etc.

Our product range covers a complete line of machines with elevator, bunker or box magazine.

The experience of carrot harvesting world-wide is built into the machines and ensuring the grower trouble-free harvesting with low maintenance and running costs. The machines are built to fulfill the demands of growers worldwide.

The heavy-duty frame construction provides strength and the modern design offers efficient harvesting, where extra capacity is required. Fresh market or processing crops, ASA-LIFT has the answer. All kinds of growers and industries will find a machine suitable for their conditions. Furthermore, we are specialized in custom-built machines.

In order to get the best solution, please contact your local dealer or contact ASA-LIFT direct.

02

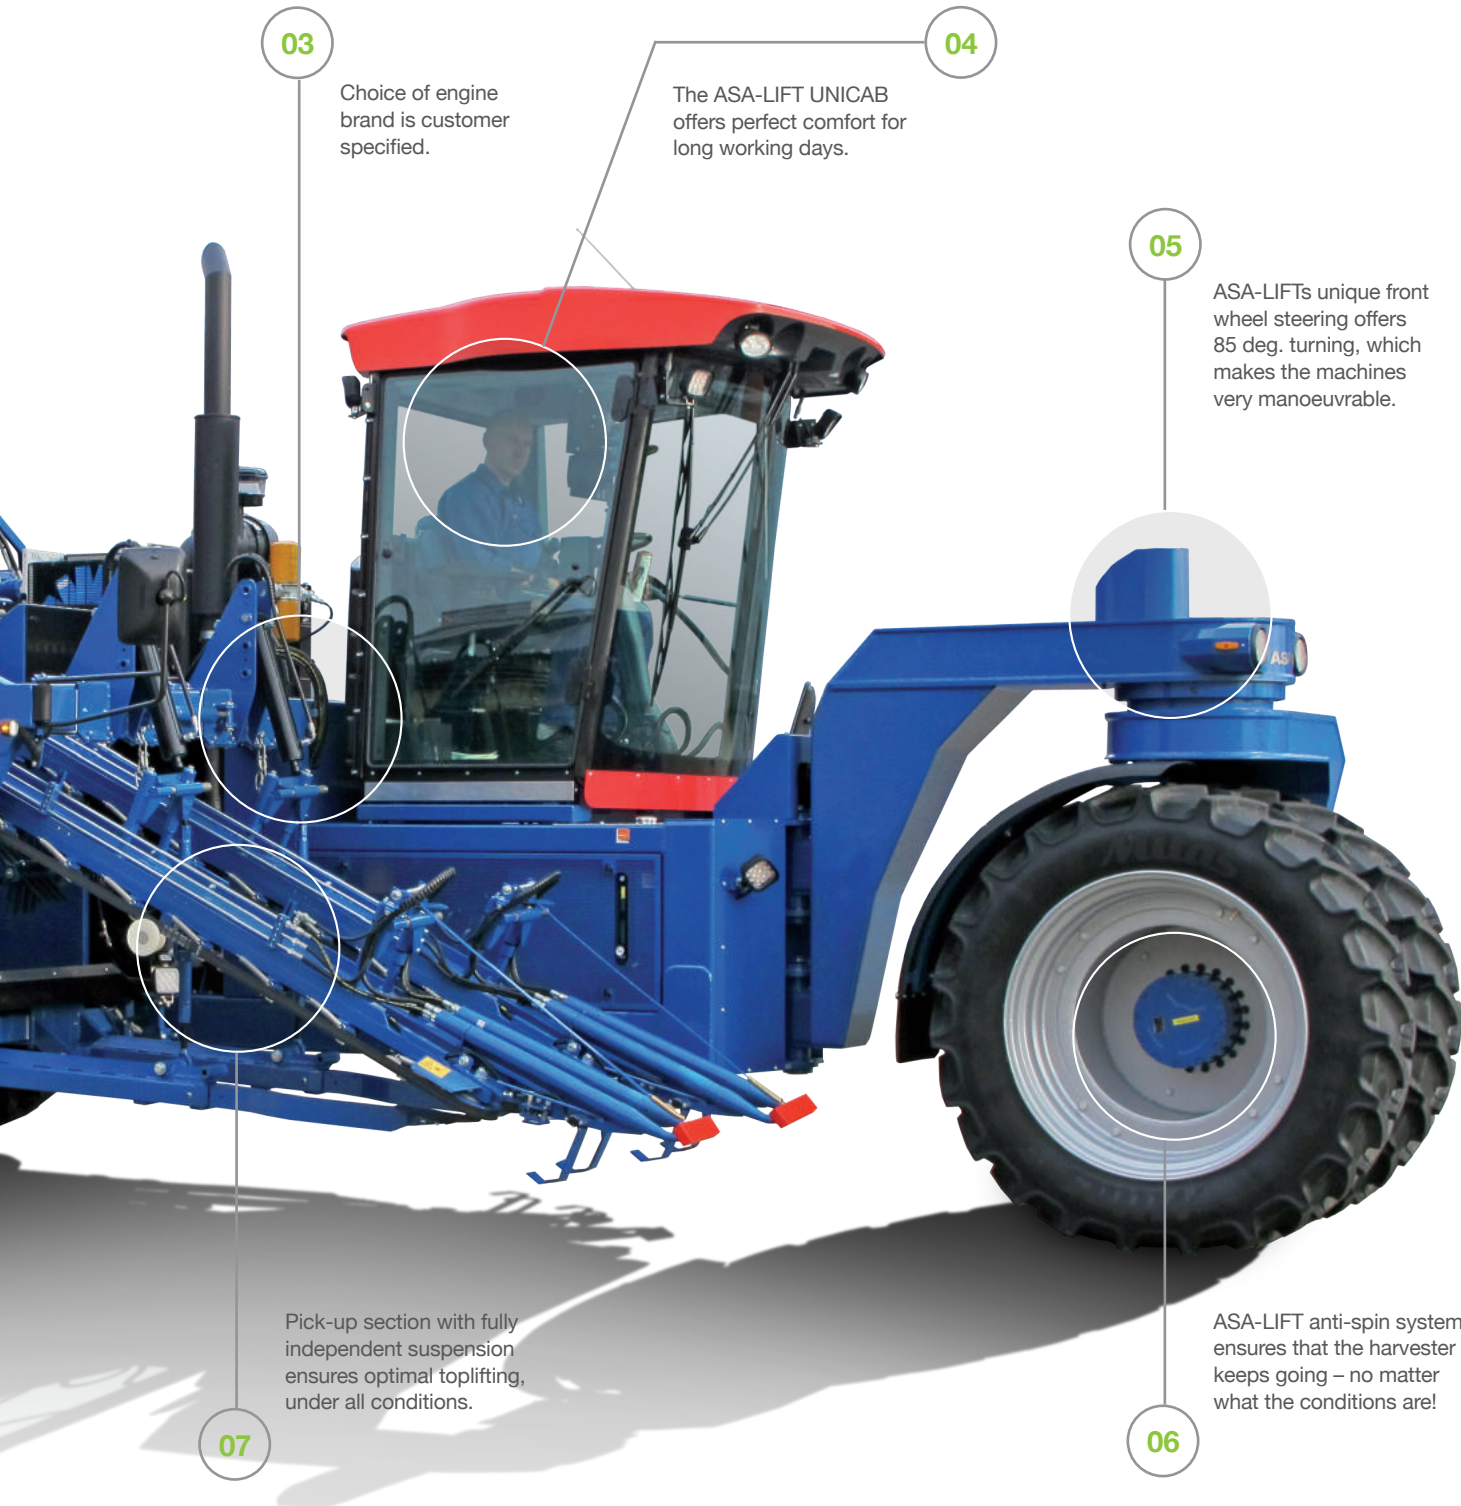

All machines are equipped with the unique ASA-LIFT cutter bar system with non-stop sprocket drive.

01

A very wide range of wheels or tracks are offered in order to optimize the harvester for every customer.

03

Choice of engine brand is customer specified.

04

The ASA-LIFT UNICAB offers perfect comfort for long working days.

05

ASA-LIFTs unique front wheel steering offers 85 deg. turning, which makes the machines very manoeuvrable.

07

Pick-up section with fully independent suspension ensures optimal toplifting, under all conditions.

06

ASA-LIFT anti-spin system ensures that the harvester keeps going – no matter what the conditions are!

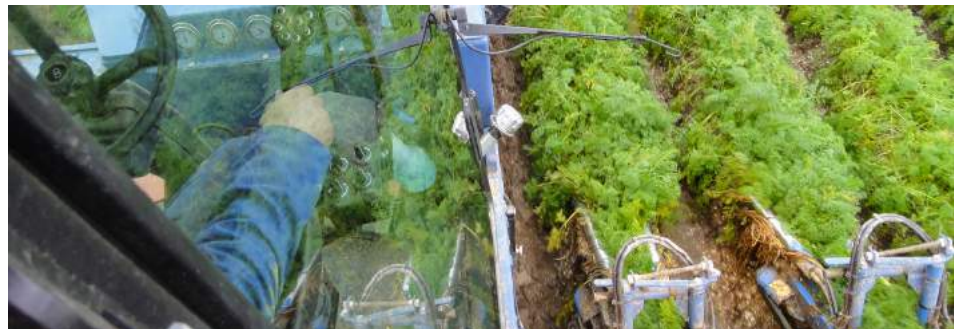

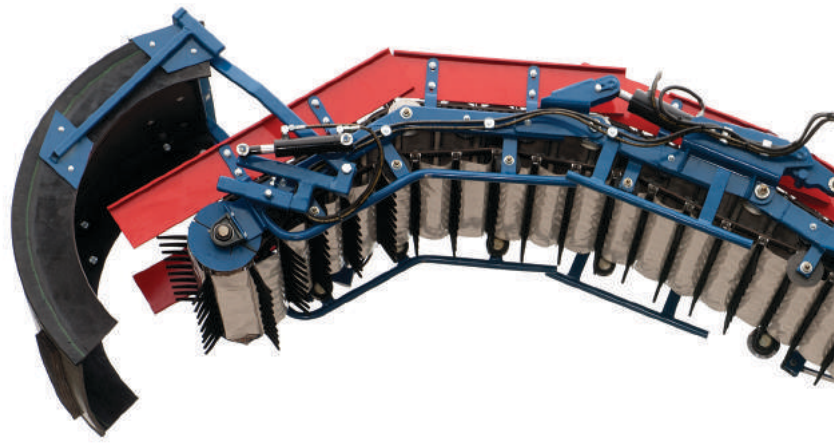

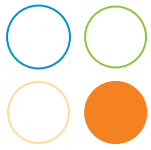

05

06

ASA-LIFT **SELF-PROPELLED** BUILT TO LAST

All ASA-LIFT self-propelled machines are fully custom-built in order to optimize the machine for your requirements. Bed system, wheel or track sizes, elevator or bunker types, engine brand etc. are all details to be carefully examined and decided upon, before the machines are designed and built.

All self-propelled machines have all-wheel drive and ASA-LIFT offers a unique anti-spin system, which keeps the harvester running – no matter what the conditions are.

When buying an ASA-LIFT self-propelled machine you will always be offered the latest development in vegetable harvesting!

ASA-LIFT SP-series was built more than 30 years ago and is sold worldwide. Each machine is specified for the given conditions "One customer – one machine".

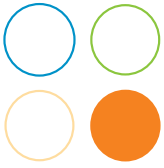

ASA-LIFT SP-SERIES DF-/CF-MODELS ELEVATOR MACHINES

01

01

ASA-LIFT SP-200 DF
with double wheels for
the "opening of fields".

SP-ELEVATOR MODELS

The ASA-LIFT SP-DF & CF models are available for 1 to 6 rows. Each machine is designed to fulfill the needs of its specific job. Length of pick-up sections, width, pitch and length of conveyors and the design of the elevators, can all be adapted to meet the requirements of every grower.

The DF models have the cabin placed at the front, with the pick-up section placed on the right-hand side. For the CF models, the cabin is placed over the pick-up sections, ensuring a perfect view of the torpedoes.

Machines are offered in 3- and 4-wheeled versions, according to the specific bed system of every grower.

To ensure the best solution for your requirements, we recommend that you contact your local dealer or ASA-LIFT direct.

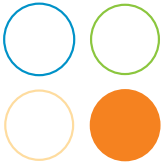

ASA-LIFT **SP-SERIES B-MODELS** BUNKER MACHINES

01

01

ASA-LIFT anti-spin system ensures that the harvester keeps going – no matter what the conditions are!

THE SP-B MODEL IS OFFERED WITH 4 – 6 TON BUNKERS. MACHINES CAN BE PREPARED FOR UNLOADING IN LOOSE WEIGHT OR FOR FILLING OF BOXES.

SP-BUNKER MODELS

The ASA-LIFT SP-B model is available for 1 to 3 rows. Each machine is designed to fulfill the needs of its specific job. Length of pick-up sections, width, pitch and length of conveyors and the design of the elevators can all be adapted to meet the requirements of every grower.

The SP-B model has the cabin placed at the front, with the pick-up section placed on the right-hand side. The bunker is placed behind the cabin, ensuring a perfect overview of the unloading of the bunker.

To ensure the best solution for your requirements, we recommend that you contact your local dealer or ASA-LIFT direct.

02

Filling of the bunker is simultaneously monitored by camera and easily followed by the driver.

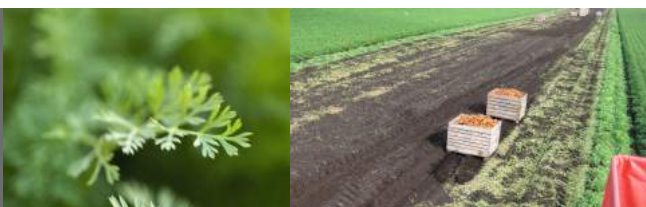

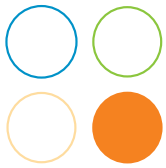

ASA-LIFT SP-SERIES BOX-MODELS DIRECT FILLING OF BOXES

SP-BOX MODEL

- Custom-built machines
- 3 wheel design with optimal manoeuvrability
- Wheels or tracks
- Unique ASA-LIFT box filling system with PLC-control

The ASA-LIFT SP-box models are available in 1 or 2-rowed versions. The integrated box filling system ensures a very gentle harvesting.

Various options are offered in order to achieve the desired cleaning of carrots, before the filling of boxes.

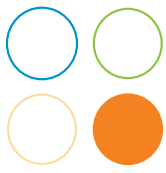

Box magazines are designed for every customer in order to fit the specific size of boxes – up to 1,000 kg. The machine can be built for simultaneous unloading of boxes as they are filled, or the full boxes can be kept on the machine and only unloaded in a specific place on the field.

01
Boxes are simultaneously unloaded during harvesting.

02
Box-model equipped with an extra elevator for unloading of carrots direct to trailer.

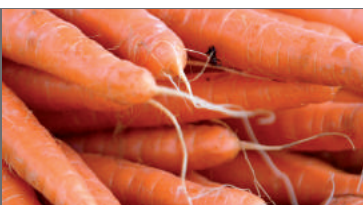

SP-SERIES **SHARE-LIFTING** OF ROOTCROPS

ASA-LIFT offers a range of share-lifting sections for the harvesting of carrots, parsnips and sweets without leaves. The pick-up section for share-lifting is either integrated in the machine or equipped with its own frame construction, making it easy to change from top-lifting to share-lifting.

To ensure the best solution for your requirements, we recommend that you contact your local dealer or ASA-LIFT direct.

SP-SERIES **CROWNING OF CARROTS** FOR THE INDUSTRY

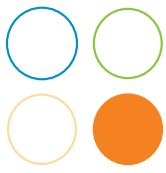

For the harvesting of carrots for the industry ASA-LIFT offers a unique disc-cutting system, which ensures efficient crowning of carrots, whether it is carrots for slicing or for dicing. Equipped with various options for the cleaning of carrots, the ASA-LIFT industrial harvesters will ensure a perfect output, which can be shipped direct to the factories.

To ensure the best solution for your requirements, we recommend that you contact your local dealer or ASA-LIFT direct.

01

Tooth discs efficiently crown the carrots as they are lifted by the pick-up belts.

SP-SERIES HIGH COMFORT CABINS

The ASA-LIFT UNICAB is specially designed for the ASA-LIFT harvesters. It ensures a perfect visibility for the driver. The cabin is mounted with full noise reduction and all functions are placed ergonomically for the driver.

The cabin is equipped with air condition and heater and also offers a seat for a co-driver.

01
Joystick with most used functions and for the driving speed of the harvester.

02
FM radio with CD-player. Bluetooth and MP3 player are optional.

03
Cabin with pick-up section on the right-hand side (DF or B models).

04
Touch screen for easy adjustment of ASA-BUS system.

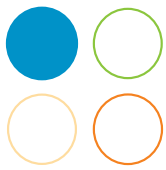

05
Air suspended seat.

06
Cabin with pick-up section in the front (CF or Box models).

07
Adjustable steering column.

07

ASA-LIFT WORLDWIDE

As a market leader in the niche of vegetable harvesting, worldwide representation is natural for ASA-LIFT. Through selected importers with specialist knowledge of their market, ASA-LIFT always offers professional guidance.

As an ASA-LIFT customer you are guaranteed the latest development in vegetable harvesting!

01
A considered balance between own production and drawing on the expertise of suppliers secures ASA-LIFT its unique flexibility.

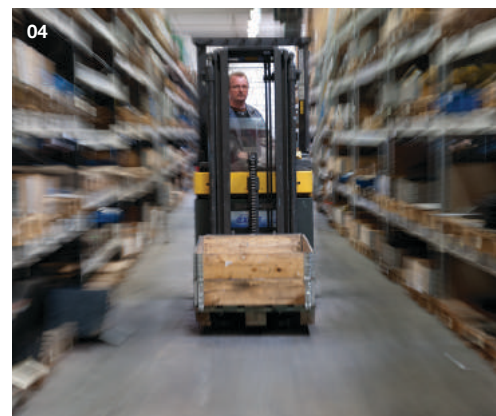

02
All our production is handled on our premises in Sorø – Denmark.

ASA-LIFT is a leading international company developing, producing and distributing vegetable harvesters. For more than 75 years ASA-LIFT machines have been sold all over the world.

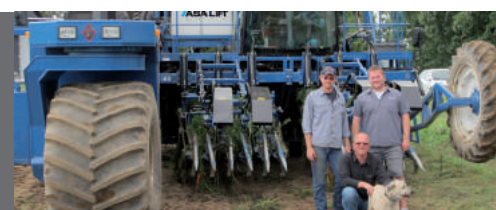

Since the beginning of mechanized vegetable harvesting, ASA-LIFT has been focused on the possibilities and challenges worldwide. Through regular meetings with vegetable growers from all over the world, combined with our strong focus on innovation we are able to provide an attractive, unique and broad product range of high quality. Taking basis in our work in the vegetable fields worldwide, we constantly adapt our machines to the given conditions and present demands.

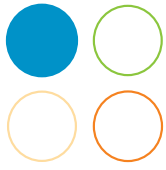

03
All machines are produced, assembled and tested in Sorò.

04
ASA-LIFT offers a full back-up with service and spare part supply – 365 days a year – year after year.

As an ASA-LIFT **CUSTOMER** you are always guaranteed the latest development in vegetable harvesting!

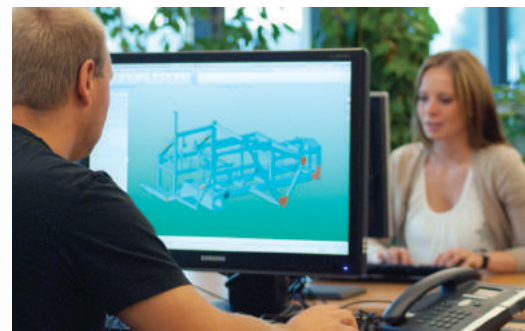

QUALITY IS NOT SOMETHING YOU SELL – IT IS AN ATTITUDE AND A WAY OF THINKING

When you contact ASA-LIFT or our dealers you will meet a company with one goal – to fulfill your request! An open discussion of the project will outline possible solutions to your request. In the process of defining the project, ASA-LIFT draws on / offers great experience gathered from all over the world. Subjects as growing method, season, soil type as well as flexibility and capacity are natural elements to discuss in the process.

When the project is thoroughly examined, ASA-LIFT will make a quotation for a solution to your request, and

together we will adjust the project proposal in order for you to get the specific solution that suits you.

When the machine has been built and delivered, ASA-LIFT will carefully follow the project in order to ensure a successful start-up and implementation. From years of experience, we know that the machine is not delivered until it is running in the field, fulfilling the need of its owner.

We aim at working together with the professional growers in order to develop the most efficient and cost effective solutions possible. With ASA-LIFT the harvesting of vegetables should be easier and more profitable. We want to supply high quality machines and professional after sales service.

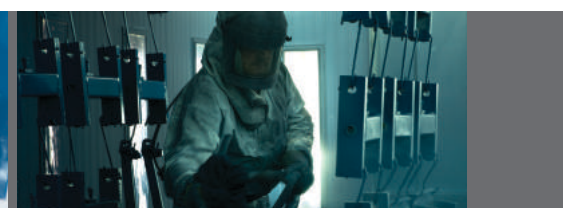

06

OUR VISION

ASA-LIFT shall remain a competitive and international market leader of high quality products and services for tomorrow's vegetable growers.
